

What MLB Team Should I Bet on Tonight? ... and in what way!?

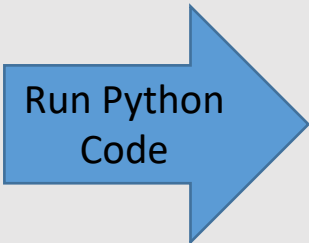

BY: JONATHAN BOSCH & ZACH ANHALT

Zach and Jonathan get so frustrated when losing their sports bets they make multiple times a week, forcing them into the black hole of college debt!

Using parameters for a “good bet” determined by Zach and Jonathan, they have written code that produces what MLB team to bet on for that day and in what way to bet on that team (Over, Under, For Spread, Against Spread).

This code pulls trend data for every MLB team from TeamRankings.com and uses the set parameters to select, match with the daily schedule of games, and notify the user which teams he/she should bet on that day, and how.
